WE CLAIM:

    1.   A system for providing real time tracking of live events occurring at a local site and live events of wireless participants, the system comprising:

    a wireless device for each wireless participant, said wireless device recognizing voice commands and generating a live event for the wireless participant in response to a received voice command; and,

    a local management server communicating with the wireless device in real time, the local management server receiving the local site live events and transmitting information regarding the local site live events to the wireless device and for receiving information regarding the wireless participant live events.

    2.   The system of claim 1, wherein the local management server is located at the local site.

    3.   The system of claim 1, wherein the local management server is located remote from the local site.

    4.   The system of claim 1, wherein the wireless participants are located at the local site.

    5.   The system of claim 1, wherein the wireless participants are located remote from the local site.

    6.   The system of claim 1, wherein the local site comprises a live auction.

7. The system of claim 1, wherein the time stamp further associates a time with the local site live events.

8. The system of claim 1, said local management server transmitting the received wireless participant live events to the local site.

9. The system of claim 1, wherein the local site live events comprise wireless participants live events.

10. The system of claim 1, wherein the wireless participant can cause a local site live event.

11. The system of claim 1, further comprising a wireless device having touch tone, digital key depression or voice command recognition, wherein the wireless participant can cause a local site live event through touch tone, digital key depression or voice command of said wireless device.

12. The system of claim 11, wherein the local management server receives wireless participant live events as touch tone, digital key depression or voice command.
